

Order Picking Forklift Truck – LO

The scope for this licence class covers the operation of order-picking forklift trucks.

An order-picking forklift truck is a type of forklift truck where the operator's control is incorporated with the load carriage/lifting media and elevates with it.

Order-picking forklift trucks can be fitted with a platform extension for use in furniture warehouses, or can be a turret truck in narrow aisle warehouses.

This licence does not cover the operation of non order-picking forklift trucks.
