Purpose

The COVID Safe Workplace Guidelines set out what employers should do as they continue, or seek to resume, business operations. By following these guidelines you will be able to show how you will comply with minimum standards determined by Public Health, and with the requirements of the Work Health and Safety Act. This will help keep your workers and others safe from COVID-19. Workplaces that do not show compliance with the standards may be subject to enforcement actions.

About the childcare services industry

The childcare services sector, also known as the education and care sector, provide education and care for infants or children, including:

- preschool education
- before and/or after school care services
- child care services
- childminding services
- children’s nursery operations, and
- family day care services.

How to comply with the new standards

Businesses must implement measures to achieve the minimum standards and must also document these measures. You will need to do a risk assessment to decide which control measures are most suited to your industry and business. You will need to take into account the level of risk of the virus spreading that exists at the time. On the following pages are examples of control measures that will help you meet each new standard.

► Template and example COVID-19 risk register (Safe Work Australia): a template for doing a risk assessment.

Managing other risks

You must manage other risks associated with COVID-19. These include:

► the risks to health and safety of workers doing unfamiliar tasks. Consult with these workers about their skills, training needs and workloads before they start new work
► the risks to mental health of workers due to the pandemic. Offer information and support, including counselling through an employee assistance program, a supportive workplace culture, or external service providers such as Lifeline or Beyond Blue.

Checklists and templates

A COVID-19 Safety Plan is a great way for businesses to document measures and show how they are keeping their customers, their workers and the community safe. These templates and checklist will help you develop a COVID-19 Safety Plan.

► COVID-19 Workplace Checklist: Use this checklist to keep your workers and others safe at the workplace and limit the spread of COVID-19. It covers working from home, physical distancing, handwashing/hygiene, cleaning and more. Update it on a regular basis.
► COVID-19 Safety Plan small business template
► COVID-19 Safety Plan medium business template: Use these templates to show how you are planning to manage any risks arising from restarting your small or medium business.

Other resources that may assist you in completing your COVID-19 Safety Plan include:

► Safe Work Australia Early childhood education and care industry information for COVID-19
► COVIDSafe Planning tool (National COVID-19 Coordination Commission): online planning tool to help you keep your workers, customers and the community safe.
► Pandemic Plan Advice (WorkSafe Tasmania): includes planning, communication and consultation, risk management, and general control measures.
► How to clean and disinfect your workplace (Safe Work Australia): explains products to use and how to clean items specific to retail, such as cash registers and EFTPOS machines.
► Safe Work Australia COVID-19 Resource Kit: includes checklists for:
  - Cleaning
  - Physical distancing
  - Health, hygiene and facilities
  - Printable signage.
► Tasmanian Government Advice on gatherings

Check this site regularly, as the numbers permitted to attend gatherings will change as the three recovery stages are worked through.

When you undertake your business activities they must be consistent with the Public Health directives at that time.
### Title: Managing risks to health and safety

An employer must manage the risk of a person contracting or spreading COVID-19 disease:

- in the workplace; or
- in connection with the conduct of the business or undertaking.

The employer must identify and manage the risks that may contribute to a person contracting or spreading COVID-19.

In managing the risks, the employer must take into account information that is published and accessible by the employer about:

- a duty or obligation imposed under the WHS Act, the Public Health Act or Emergency Management Act
- relevant information, recommendations or guidance materials published or specified by a public authority, an equivalent Commonwealth authority, or a relevant industry body, in relation to COVID-19
- the nature of the work being performed
- the nature of the industry in which the work is being performed
- the environmental conditions of the workplace, such as design, layout or systems of work, which may increase a person’s exposure to COVID-19.

The above information needs to be considered when:

1. implementing the controls, and
2. reviewing and adjusting the controls.

### Actions to control the risks associated with COVID-19 may include, but not limited to:

In managing risks, you must seek to eliminate the risk first, as far as is reasonably practicable. If you can’t eliminate it, you must minimise the risk as far as is reasonably practicable.

Apply the hierarchy of controls using the highest level of control that is reasonably practicable. You may need a combination of controls.

Eliminating the risk is the best option, followed by substitution, then isolation and engineering controls. If the above can’t be achieved, then reduce the risk through administrative controls. Reducing the risk by using personal protective equipment (PPE) is the lowest level of control.

Maintain your control measures and review them regularly to ensure the highest level of effective control is being used.

Consult with workers and/or their health and safety representatives (HSRs) throughout this process.

The first step is to undertake a risk assessment. This can help you:

- identify which workers are at risk of exposure
- determine what sources and processes are causing the risk
- identify what kind of control measures should be put in place, and
- check the effectiveness of existing control measures.

Complete and review your risk assessment regularly to ensure your control measures are still working; or if risk levels change.

Key things to consider:

- What are the current legal requirements (e.g. public health orders, health directions) for my area and how do they apply to my business?
- Does the nature of the work undertaken by my business increase the risk of my workers being exposed to COVID-19?
- What effect could the COVID-19 controls I implement have on other hazard management controls already in place?
- Does my workplace have facilities for hand washing and/or hand sanitising?
- Does my workplace environment/layout increase the risk of my workers and/or clients being exposed to COVID-19 and can this be changed?
- Do I have workers that fall within a vulnerable worker category?
- What are my current cleaning and disinfecting arrangements?
- How prepared is my business if there is a case of COVID-19 in the workplace?
- Is there an increased risk of violence in my workplace?
- What worker communication and support mechanisms are in place?
- Do the changes I plan to make to my business or changes arising from COVID-19 change the risk?
- Do I have a plan to review my control measures to ensure they are effective?

<td>2. Cleaning and hygiene</td>
<td><strong>Cleaning</strong>&lt;br&gt;The employer must prepare, implement and maintain a schedule for cleaning, and where appropriate disinfecting, that ensures the workplace is routinely cleaned. This must include furniture, equipment and other items&lt;br&gt;The cleaning schedule should be in writing so that all workers are aware of the requirements. The schedule should take into account the level of risk of exposure to, contracting or spreading COVID-19 within the workplace.&lt;br&gt;This schedule is to set out both the frequency and manner in which cleaning and disinfecting is to be done.&lt;br&gt;<strong>Hygiene</strong>&lt;br&gt;The employer is to put a hygiene procedure in place to ensure all persons at the workplace are observing appropriate hygiene measures to minimise the risk of exposure to, contracting or spreading COVID-19 within the workplace.&lt;br&gt;This procedure is to address the cleaning of hands by workers and other persons in the workplace using soap and water or the use of hand sanitiser, as appropriate for the circumstances.&lt;br&gt;<strong>Supplies and Equipment</strong>&lt;br&gt;The employer must provide all the supplies and equipment necessary to ensure that the cleaning schedule and hygiene procedure implemented for the workplace is able to be complied with.</td>
<td><strong>Cleaning</strong>&lt;br&gt;► You should arrange for extra cleaning of frequently used surfaces. Document this in your cleaning schedule.&lt;br&gt;Frequently used or touched surfaces or items, include:&lt;br&gt; - play gyms, toys, nappy change facilities, cots, tables, hard-backed chairs, doorknobs, light switches, remotes, handles, desks, and other educational resources&lt;br&gt; - phones, keyboards and EFTPOS machines&lt;br&gt; - amenities, including toilets, taps and sinks&lt;br&gt;► Ensure the cleaning of less frequently used surfaces at least daily&lt;br&gt;► Consider the National Health and Medical Research Centre (NHMRC) childcare cleaning guidelines&lt;br&gt;► Any surfaces that are visibly dirty, or have a spill, should be cleaned as soon as this is noticed, regardless of when they were last cleaned&lt;br&gt;► Using detergent and water is appropriate for cleaning&lt;br&gt;► Cleaning should start with the cleanest surface first, progressively moving towards the dirtiest surface&lt;br&gt;► When surfaces are clean they should be as dry as possible, to prevent slips/falls and the spread of viruses and bacteria through droplets&lt;br&gt;► Disinfecting means using chemicals to kill germs on surfaces. These can be in the form of liquids/sprays or wipes, and are labelled as “disinfectant” on their packaging&lt;br&gt;► Disinfectants are usually only necessary if a surface is contaminated with potentially infectious material, or if your workplace has many customers or others entering each day&lt;br&gt;► It is important to clean before disinfecting&lt;br&gt;► Consult with staff responsible for cleaning, or your cleaning contractor. Ensure they can maintain the increased cleaning schedule. Discuss any supplies or equipment needed&lt;br&gt;► Display your cleaning schedule in the workplace. Ensure staff sign them off each time they clean the area/items.</td>

| 3. Restrictions on entry to the workplace | The employer must take all reasonable steps to ensure that a worker does not enter or attend the workplace if the worker is required to isolate, or quarantine, under a direction by:  
- the Director of Public health, under the Public Health Act 1997, or  
- the State Controller under the Emergency Management Act 2006.  
A worker must not enter a workplace if the worker is required to isolate, or quarantine, under a direction made by:  
- the Director of Public Health, under the Public Health Act 1997, or  
- the State Controller under the Emergency Management Act 2006.  
However, a worker is able to be at a workplace for the following reasons:  
1. to obtain medical treatment or testing in relation to COVID-19, and the workplace is the appropriate place to receive such treatment or testing, or  
2. the worker is required or permitted, under a direction made in relation to COVID-19, to enter or be at the workplace, and does so in accordance with that direction, or  
3. there is an emergency and the worker is entering or at the workplace to protect:  
   - the safety of the worker, or  
   - the safety of another person, or  
   - the worker’s property or the property of another person. | ▶ Display signs at entry points of your premises telling people not to enter if they have COVID-19 symptoms, cold/flu symptoms or have been in close contact with confirmed cases  
▶ Ask people to leave the education and care or child care setting if they display symptoms associated with COVID-19  
▶ Ensure contractors and visitors to larger child care settings confirm they are well when ‘signing in’  
▶ Update your induction procedures to ensure all contractors are aware of your COVID-19 controls  
▶ Try to reduce contact with delivery drivers. Where practical, complete all paperwork electronically  
▶ Education and care or child care services should also follow AHPPC advice on restrictions on entry, see Australian Health Protection Principal Committee (AHPPC) statement on early childhood and learning centres.  
To assist with contact tracing:  
▶ You should put in place a process to enable workers, and other visitors to your workplace to sign in and out when they attend the workplace  
▶ These records must be kept for at least 28 days, and be provided as soon as possible if requested by the Director of Public Health.  
▶ Education and care services should also follow AHPPC advice on restrictions on entry, see Australian Health Protection Principal Committee (AHPPC) statement on early childhood and learning centres. |
4. **Physical distancing at the workplace**

An employer must take all reasonable steps to ensure that as far as is reasonably practicable that the current physical distancing requirements are complied with. The current requirements are detailed at [coronavirus.tas.gov.au](https://coronavirus.tas.gov.au).

If it is not reasonably practicable to comply with the physical distancing requirements described above, then the employer should ensure that control measures are implemented in keeping with the requirements to manage the risks to health and safety relevant to COVID-19 as described in the “Managing Risks to Health and Safety” section of this document.

A person at, entering or leaving a workplace must ensure that s/he complies with physical distancing requirements of that workplace, if it is reasonable to do so.

Note: some premises may be exempt from the maximum density limits under the current Public Health Directions. Please refer to [coronavirus.tas.gov.au](https://coronavirus.tas.gov.au) for the latest advice and Directions.

| 5. Providing instruction, training and supervision in respect to COVID-19 | The employer must provide each worker at the workplace (including contractors and volunteers) with information, training and instruction on:  
  • the risks in relation to COVID-19, and  
  • the control measures implemented in the workplace to mitigate those risks, in relation to COVID-19.  
  The employer must provide adequate supervision to ensure that the control measures are implemented in the workplace in relation to COVID-19.  
  The employer must also ensure that information and instruction is provided to other persons entering the workplace about the control measures in place to mitigate the risks of COVID-19 and the requirements of those persons to apply the control measures.  
  The information and instructions are to be in a format that is reasonable to the circumstances.  
  A worker or other person, at the workplace or entering or leaving the workplace, must comply, so far as the person is reasonably able, with any reasonable instruction that is given by the employer to allow the employer to manage the risks to health and safety within the workplace. | ► Ensure everyone is aware of their responsibility to protect themselves, other workers, and the public  
 ► Provide workers with written advice on how to manage COVID-19 risks  
 ► Display signs around the workplace/premises advising of risk control requirements. For example, covering coughs, maximum number of people in a room, not to enter workplace if unwell  
 ► Provide children with age appropriate information and reminders about personal hygiene  
 ► Provide workers with training in COVID-19 controls (conduct training using physical distancing)  
 ► Brief workers on the symptoms of COVID-19. Tell workers to stay home if they aren't feeling well; even if they consider their symptoms minor  
 ► In limited settings where personal protective equipment (PPE) is required, provide workers with instructions on how to use it correctly  
 ► Ensure workers know what to do if someone at the workplace becomes infected with COVID-19  
 ► Give supervisors guidelines for ensuring COVID-19 controls are applied/enforced at all times  
 ► Document/record COVID-19 procedures; provide training to workers in these  
 ► Keep notes of issues raised and discuss at staff meetings  
 ► Attendees on premises must comply with any reasonable direction given to them about COVID-19 controls  
 ► Employers must advise attendees on the premises of these requirements using signs at the entrances of their premises. |

| 6. Responding to an incident of COVID-19 in the workplace | The employer at a workplace must ensure that an emergency plan is prepared for the workplace that provides for emergency procedures, testing of the procedures and the provision of information, training and instruction to relevant workers in implementing the emergency procedures. | An emergency plan is a document that sets out instructions for workers and others in the case of an emergency. A COVID-19 emergency response plan should detail:  
► How the business will respond in the event of contamination by a worker, child or parent  
► Who has responsibilities in this event.  
Immediately notify Public Health by phoning 1800 671 738 and follow their advice to:  
► Help the affected person receive medical treatment  
► Identify who has been in close contact with the ill person  
► Isolate the affected areas: keep staff and children away. You may need to close the site until advised it is safe to reopen.  
For education and care and child care services please also notify the Education and Care Unit by submitting a notification via the National Quality Agenda IT System (NQAITS).  
Organise cleaning of the area as directed by Public Health. For cleaning:  
► Review the Safe Work Australia guidance on cleaning and disinfecting workplaces  
► Wear PPE: face mask, protective eyewear and gloves  
► Remove soiled or contaminated items and dispose of them in a safe way  
► Clean and disinfect all surfaces or items that may have been in contact with the ill person.  
In some cases, you must notify WorkSafe Tasmania. Check the WorkSafe Tasmania website for requirements.  
You may need to include in your plan:  
► Contact details for people who have specific roles or responsibilities under the emergency plan. For example, managers, security, cleaners, or first aid officers  
► Contact details for COVID-19 notification to Public Health  
► A description of the method to alert people to an emergency or possible emergency – this may be affected by remote working  
► Any changes to evacuation procedures or assembly points  
► The post-incident follow-up process, including who must be notified. (This may include the process for notifying the business if a worker experiences an emergency while working from home.)  
► If you share facilities, include a process for advising other businesses about a diagnosis of COVID-19  
► Procedures for testing the emergency plan, including the frequency of testing must be included  
► Arrange training to ensure all staff are aware of, and understand the plan. |
