

# Are your workers silica safe?

Inhaling even a tiny amount of silica dust can cause deadly silicosis. If your workers are at risk of silica dust exposure, you need to provide adequate health monitoring, training and supervision.

Learn more about your silica safety responsibilities at [worksafe.tas.gov.au/silicasafe](https://worksafe.tas.gov.au/silicasafe)

**Don't breathe dust. Be silica safe.**
