

Materials Hoist – HM

*Cantilevered platform materials hoist
(barrow hoist)*

The scope for this licence class covers the operation of materials platform hoists.

A materials hoist means a hoist that consists of a car, bucket or platform cantilevered from, and travelling up and down outside, a face of the support structure and is used for hoisting things and substances but not persons.

Materials platform hoists may also be operated by anyone holding a hoist (personnel and materials) operation licence or equivalent
