

Intermediate Rigging – RI

Typical hoist with jib

*Rigging of cranes
(tower crane type)*

*Tilt Slab with loading
equaliser gear*

The scope of work for intermediate rigging includes:

- rigging work in the class Basic Rigging
- hoists with jibs and self-climbing hoists
- rigging of cranes, conveyors, dredges and excavators
- tilt-slabs
- demolition of structures or plant
- dual lifts.

Intermediate rigging work does not include:

- rigging of gin poles and shear legs
- flying foxes and cableways
- guyed derricks and structures;
- suspended scaffolds and fabricated hung scaffolds.

It is a prerequisite that applicants for the intermediate rigging licence already hold or have previously passed assessment for a dogging and basic rigging licence. Alternatively, assessment for applicants for the intermediate licence must incorporate the requirements of dogging and basic rigging licence assessments.

You do not require a licence if you are positioning integral outriggers or stabilisers to set up a crane or hoist.
